

THIS YEAR THE AUSTRALIAN GOVERNMENT WILL START CENSORING YOUR INTERNET CONNECTION.

A secret blacklist will control which websites Australians will be blocked from seeing.

THERE IS NO WAY TO OPT OUT OF THE FILTER.

The scheme has been promoted as a tool to help parents, but the list will only block a small number of sites and won't include R- or X-rated sites. Experts agree it won't be effective in stopping illegal content, but many legal pages could potentially be blocked.

IT WON'T HELP KIDS - JUST GIVE PARENTS A FALSE SENSE OF SECURITY.

Your right to decide what is appropriate for you and your family is being eroded. Take action now.

Go to openinternet.com.au
to learn more and find out how you
can help stop it before it's too late.
